

Course Details

Oracle Life Sciences Data Hub (LSH) API Programming Training

About this course

The objective of this 1-day course is to learn LSH API Programming through workshops led by the instructor and hands-on exercises. The course starts with a general introduction to LSH API programming where the LSH data model and API set are introduced. Students then learn LSH API programming techniques through a series of increasingly complex worked examples.

Who is it for?

This course is for people who intend to use the LSH APIs to write automations, add-ins and adapters for LSH. Delegates must have a good understanding of basic LSH functionality, for example, gained from the pharmaSOL LSH Overview training. A basic knowledge of PL/SQL programming is also required.

What is covered?

- Introduction to LSH API programming
- Introduction to the LSH data model
- My first LSH API program
- Creating LSH objects through API programming
- Error handling
- Parameter programming
- Message driven job submission

Locations and Course Dates

- This course is available as on-site training or at one of our Pharmasol offices located in the United Kingdom or Germany.
