

## Course Details

### Oracle Argus Safety 5.1 Administrator Training

#### About this course

The objective of this 2 day course is to learn about the major application administrator features and functions of Oracle Argus Safety through workshops led by the instructor and hands-on exercises. The course will start with an overview of the administration console in Oracle Argus and will then lead on to a more detailed look at each of the configuration aspects which will allow the student to learn how to set up and manage company specific data and perform system administration.

#### Who is it for?

This course is aimed at people who have no prior experience of Oracle Argus however prior experience of administering Oracle applications and/or drug safety / pharmacovigilance is recommended.

#### What is covered?

- Overview of the safety database
- Navigation & menus in Oracle Argus Safety system
- Administration of users
- Managing code lists
- Business configuration: company products, licenses and studies
- System configuration
- Maintenance of reports
- Using Advanced Conditions
