

Course Details

Oracle Clinical Complex Procedures Training

About this course

The objective of this 1 day course is to understand the limitations of validation and derivation procedures within Oracle Clinical and learn how to overcome them by efficient use of Custom Code and external procedures, as well as the integration of 3rd party data sources. This will provide the required knowledge for implementing any check. The efficient use of these techniques will be demonstrated through hands-on exercises and real-life examples.

Who is it for?

This course is aimed at people who have at least one year's experience of Oracle with extensive prior experience of building validation and derivation procedures. Some knowledge of the Oracle Clinical data model and SQL or PL/SQL is recommended.

Recommended other courses?

Oracle Clinical Standard and Advanced Procedures, 2 days
Oracle Clinical Table Model, 1 day
SQL and PL/SQL for Procedures, 1 day

What is covered?

- Standard vs. Complex procedures, understanding limitations of standard procedures
- Understanding how data is retrieved by Oracle Clinical: PL/SQL cursors
- Manual updates to the code generated by Oracle Clinical
- Efficient use of Custom code
- Integration of data from 3rd party applications into OC procedures
- Integrating external procedures
- Implementing a missing pages validation check
- Implementing a cross-study validation check
- Performance considerations
