

Course Details

Oracle Clinical Table Model Training

About this course

The objective of this 1 day course is to understand the Oracle Clinical database model and the data extraction views functionality. Attendees will learn how data is stored in the database, a requirement to build advanced validation procedures, create custom reports or program interfaces to 3rd party applications. The retrieval of data will be exercised through hands-on exercises including the build of a report.

Who is it for?

This course is aimed at people who have at least one year's experience of Oracle Clinical. Some knowledge of SQL or PL/SQL is recommended.

Recommended other courses?

Oracle Clinical Overview, 1 day
Introduction to SQL for OC users, 1 day

What is covered?

- Oracle Clinical Database Schemas
