JOB DESCRIPTION

YOUR CHALLENGES & OPPORTUNITIES

- You are the one creating user interfaces from technical conception to development and implementation. In the development team you are the expert for the user interfaces.
- When we are creating mock-ups, new features and proof-of-concepts that will also serve as foundation for formal design and development solutions you can let your creativity run wild.
- You have a conceptual approach to user interface design and business workflows for complex web-based applications.
- Testing user interfaces at all levels of implementation on different browsers has always been part of your daily business.
- You establish a companywide user interface design strategy and define the style guide. Ensuring that standards and user interface design principles are being kept is one of your main objectives.
- In general, you are the master of "state of the art" user interface design standard

WHAT YOU SHOULD BRING

- You have a Bachelor in Computer Science, Computer Engineering, or similar with at least 4 years of proven experience working with web application frameworks, preferably Oracle APEX and front-end frameworks, e.g. AngularJS
- Strong experience with web development base technologies, such as CSS, jQuery, JavaScript, HTML, XML, etc. is crucial.
- Basic understanding of databases and experience with webservers like Apache Tomcat is beneficial.
- Experience with responsive interface design no matter what type of device is being used will be highly appreciated.
- Continual professional development to keep up to date with new user interface design trends and technologies is always on your list.
- Your communication skills – also in English - are as strong as your writing, verbal, and analytical skills.
- When working on ambitious timelines you always pay attention to details.
- You are a strong team player, but also can work independently and efficiently.

WHAT AWAITS YOU

- Flat hierarchies with the chance to make your own footprint and quickly take over responsibilities.
- An innovative and international work environment at a constantly growing business in a motivated team with colleagues from all over Europe and the US.
- The opportunity to constantly develop through individual, internal and external training
